Academic Projects

DARKNESS DETECTOR(MINOR PROJECT)

Created a darkness detector with circuit comprising of IC -555 timer, light dependent resistors.

Salient features of the circuit

Automated lightning system during the darkness.

Inexpensive, easy to install and Small PCB size.

FREQUENCY & PULSEWIDTH MEASUREMENT (MAJOR PROJECT)

Frequency and pulse width measurement circuit using PIC 16F877 microcontroller.

Measures frequency of different wave forms using function generator.

Achievements & Extra Curricular

Participated in PCB designing workshop held at Sagar Institute of Research and Technology Bhopal.

Stood first consecutively three times in English story writing competition held at school.

Strengths

Capability to withstand during the troughs of life.

Quick Learner

Self-Improvement

Good Listener

Additional Skills

Proficiency in SCADA

Trained at working on ALAN-BRADLEY PLC
